Method overriding (method overriding) is a feature of object-oriented programming that allows a class to define a method that has the same name as a method in its superclass. This is done by overriding the method in the subclass. The overridden method in the subclass can then call the method in the superclass, or it can do something completely different. This is useful for extending the functionality of a class without changing the code in the superclass.

La bibliothèque standard de C++ - libstdc++

La bibliothèque standard de C++ est en grande partie un sur-ensemble des fonctions disponibles dans la bibliothèque standard de C. Elle englobe la Standard Template Library (STL) qui met à la disposition du programmeur des outils puissants comme les collections (conteneurs) et les itérateurs.
